

Rural Housing Enabler Galluogydd Tai Gwledig

Affordable Housing

Homes below market price made available for local need. It can be rent, buy or a combination of both.

Rural Communities

The lack of affordable homes in rural communities in Wales is a major issue. People are forced to leave the place where they may have been born and brought up in. The shortage threatens the social and economic sustainability of many rural communities.

Rural Housing Enabler (RHE)

The RHE works with communities, offering independent advice and support, acting as a facilitator or "honest broker".

Action

The Rural Housing Enabler can assist rural communities to develop local partnerships, identify possible development sites and assess local housing need. The enabler offers assistance through the planning process to landlords and the Community Council to ensure inclusion and full participation in an open process.

Local Needs

Occupation of housing provided through this process will be limited to local people who meet local connection criteria set by the planning authority.

Henk Jan Kuipers
